Düsseldorf

Important information for exhibitors

Alarm loudspeakers

All rooms which are enclosed on all sides must be connected to the alarm system of Messe Düsseldorf in order to guarantee an alarm on the stand (also see Technical Guidelines of Messe Düsseldorf, item 4.4.4 and 2.6).

The halls of Messe Düsseldorf are equipped with alarm systems which carry out a special notification/evacuation sequence in the event of an incident.

As an exhibitor, you should inform your employees about this procedure. Please be aware that you are responsible for the evacuation of your stand.

You can order the alarm loudspeakers and the corresponding connection in the OOS of your event under Stand -> Communication Technology -> Devices -> PA-Systems.

Or simply enter the article numbers BE3303 and BE3302 in the OOS.
